

# PERFORMANCE BRIEF

## Pompano Beach Fire Rescue

### 3<sup>rd</sup> Quarter Report

---

Release July 29, 2021

This report summarizes call volume trends for Pompano Beach Fire Rescue. Data for reporting periods are compared with comparable times to monitor trends. Note that the analysis is based on preliminary data, and is always subject to change or be revised in the future.

## THE CALL-VOLUME SITUATION

**Year to Date** - From October 2020 to June 2021 Pompano Beach firefighters responded to 20,238 incidents, down 7.3 percent compared to the same period last year. The total computes to an average of 74 calls per day, with more than half (51.1%) of the incidents requiring emergency medical transport to a hospital (Table 1).

- Saturday and Sunday were the busiest days of the week, averaging 78 calls each.
- Zone 52 and Zone 63 accounted for 45 percent of the call volume.

**On a quarterly basis**, the level was however up for the third quarter (April through June): 8.7 percent from 6,330 to a total of 6,936 incidents. This is equivalent to an average of 76 incidents per day from a mean of 70 during the same time period last year.

**Coronavirus (COVID-19) Impact on call volume** – The overall decline in call volume and emergency transport level in the last two years seems to reflect in part the effects of the coronavirus (COVID-19) pandemic and the efforts to contain it.

**Table 1. Call Volume**

	5-Year Average	Oct-Jun YTD	Oct-Dec			Jan-Mar			Apr-Jun
